PROFESSIONAL EXPERIENCE

Times Network (Bennett Coleman & Co. Ltd.)

Feb 2026 – Present

Software Engineer Intern

Noida, India

- Contributed to the development and enhancement of SocioWatch(CMS), by implementing and optimizing 20+ frontend and backend features using React.js, GoLang and REST APIs. Collaborated across teams to deliver production-ready solutions and eliminating critical production bugs by 35%.
- Managed end-to-end dev environment setup and deployment of 5+ CMS microservices on Azure Virtual Machines, ensuring seamless service integration and operational stability. Streamlined Linux-based administration, improving release efficiency by 40%.
- Independently developed and maintained the WhatsApp Community Console, implementing 15+ features and enhancements from development to production deployment. Built backend integrations and optimized application workflows, improving system efficiency by 30%

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, Go, SQL, HTML, CSS

Frameworks & Libraries: React.js, Node.js, Express.js, REST APIs, Tailwind CSS, Chart.js

Tools & Platforms: Git/GitHub, Docker, Postman, Azure, Linux, CI/CD, JWT

Databases: MongoDB, PostgreSQL, Elasticsearch

Core Concepts: Data Structures & Algorithms, OOP, Microservices, SDLC, Agile/Scrum

PROJECTS

Expense Tracker App | React.js, Node.js, Express.js, MongoDB, REST API, JWT

- Developed a full-stack personal finance application with JWT-based authentication, designing and documenting 10+ RESTful API endpoints for seamless frontend-backend integration.
- Implemented a rule-based budget optimization system to generate smart spending recommendations and displayed insights through interactive Chart.js dashboards.
- Established secure data models and transaction workflows in MongoDB, enabling real-time expense categorization, budget monitoring, and monthly financial reporting.

Interview Prep Portal | React.js, Node.js, Express.js, MongoDB, Tailwind CSS

- Built an AI-powered interview preparation platform integrating Gemini API to auto-generate 100+ role-specific technical Q&As across 10+ engineering roles, reducing manual content creation effort.
- Crafted a responsive UI with Tailwind CSS featuring question pinning, accordion Q&A, and in-app notes and improved backend APIs for efficient response handling (300ms).
- Enabled personalized learning experiences through advanced search, bookmarking, and session history capabilities, increasing content accessibility and user retention.

EDUCATION

Bennett University, Greater Noida

Sep 2022 – May 2026

B.Tech in Computer Science and Engineering (Data Science) | CGPA: 9.39 / 10.0

ACHIEVEMENTS

- Amazon ML Summer School 2025:** Selected among top 5% of 100,000+ applicants nationwide.
- Published Research — ChatGPT's Use Case for Software Engineers:** Presented at ICCET Research Conference, 8th Edition, NIT Patna.
- Finalist, Epoch Hackathon, IIIT Delhi:** Competed among 100+ teams and delivered a cost-minimizing gas pipeline placement algorithm reducing simulated costs by 30%.
- Solved **450+** LeetCode problems (top 15% globally), mastering trees, graphs, DP, and system design patterns.

CERTIFICATIONS

- Data Structures | UC San Diego (Coursera)
- MySQL Bootcamp | LetsUpgrade
- DSA with Java | Alpha by Apna College
